Summary

I am a third-year student at BSUIR with experience in Java development. I possess practical skills in creating Java applications, including working with databases, RESTful APIs, and frameworks. I am passionate about technology and constantly expand my knowledge. I am seeking opportunities for further professional development as a Java developer.

Skills

- **Programming languages:** Java, C/C++, JS, HTML, SQL
- **Technologies:** Spring Framework, Spring Boot, Git, REST, SOLID, Spring Security, React, JWT, Mockito, Unit tests.
- **Languages:** English (B2).

Education

Belarusian State University of Informatics and Radioelectronics   2022 – 2026

Projects

Task-Management-System   Task-Management-System

- Web application built with Java Spring for managing tasks and appoint employees.
- Tools Used: Java, Spring Framework, Spring Security, Git, Unit tests, Mockito, JWT.

Weather Application   Weather-App

- Web application built with Java Spring for retrieving weather information in different cities.
- Tools Used: Java, Spring Framework, Spring Security, Git, Unit tests, Mockito, JWT.

Blog Platform   Blog Platform

- Web application developed as a test project to implement a blogging platform
- Tools Used: Java, Spring Framework, Mockito, Unit tests

Neural Network   Neural Network

- Perceptron for Recognizing Handwritten Words
- Tools Used: C/C++
